DETAILED ACTION

1. This office action is in response to the amendment and remarks filed 01/15/2008. Since the examiner has applied new grounds of rejection, this office action is being made non-final to afford the applicant the opportunity to respond to the new grounds of rejection.

Drawings

1. The drawings filed on 01/15/2008 have been approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10, 11 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Noack (US 1,935,659).

Art Unit: 3746

Noack teaches a gas turbine comprising: a combustion chamber having a combustor wall (6-9) and a plurality of coolant tubes 7 forming part of the combustor wall, said combustion wall comprises a plurality of segments (first segment 9, second segment 6), each segment interconnected to a consecutive segment through a plug and socket connection.

With regards to the recitation “cast material”, where a product by process claim is rejected over a prior art product that appears to be identical, although produced by a different process, the burden is upon the applicants to come forward with evidence establishing an unobvious difference between the two. See *In re Marosi*, 218 USPQ 289 (Fed. Cir. 1983)

Allowable Subject Matter

4. Claims 12-18 and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
